

SOUNDARYA G

Training & Development Specialist | soundaryafocus@gmail.com | +91 9361367501 | linkedin.com/in/soundarya29 | github.com/soundarya48

PROFESSIONAL SUMMARY

Training and development professional with 2+ years of experience designing and delivering structured learning programs for technical audiences, from defining learning objectives through building assessments and measuring outcomes. Skilled at translating complex technical concepts into digestible modules, activities, and assessments for learners at different skill levels. Experience spans full curriculum design, hands-on project-based learning, assessment/rubric development (including building an automated online assessment platform), and iterating on content based on learner feedback and performance data. Comfortable working independently, managing multiple deliverables, and collaborating with stakeholders to keep training programs aligned with real-world outcomes.

CORE COMPETENCIES

Learning Objective Design • Curriculum & Instructional Content Development • Assessment & Rubric Design • Learner Progress Tracking • Project-Based Learning Facilitation • Technical Content Simplification • Stakeholder Communication • Feedback-Driven Iteration • Documentation of Processes & Best Practices • Digital/Remote Content Delivery

RELEVANT EXPERIENCE

Technical Trainer

2024 – Present

Yellowmatics.ai • Erode, Tamil Nadu

Learning Program Design & Delivery

- Designed and delivered structured learning programs in full stack web development (MERN, Java, Python, SQL) and data analytics, defining learning objectives and mapping them to modules, hands-on activities, and project-based assessments for cohorts with mixed skill levels.
- Built the full learning pathway for student batches — from requirement gathering and planning through development, testing, and deployment — giving learners a complete, job-ready project lifecycle rather than isolated exercises.
- Adapted teaching pace, depth, and content format based on individual learner progress, ensuring consistent outcomes across a range of starting skill levels.
- Evaluated learner project submissions against defined criteria and delivered structured, constructive feedback to support measurable skill growth and portfolio readiness.

Assessment & Content Development

- Designed and built **ALISA**, an end-to-end online assessment platform with MCQ and coding test modules, configurable question banks, and automated grading logic — directly analogous to designing quizzes and rubrics at scale, and removing 100% of manual evaluation effort.
- Created 5+ Power BI and Tableau dashboards translating raw performance and operational data into clear, actionable reporting for stakeholders, reducing manual reporting time by ~3 hours/week — demonstrating the same clarity-first content design used in instructional materials.
- Documented recurring training workflows and evaluation processes to support consistency across batches and instructors.

ASSESSMENT & PLATFORM PROJECTS

- ALISA — Online Test & Assessment Platform:** Built configurable question banks, time-boxed tests, live monitoring, and automated grading and result tracking; reduced assessment setup time from hours to minutes. (React, Node.js, MongoDB, MySQL)
- Nexus — Attendance & Project Management System:** Full-stack platform with role-based access for 4 distinct user types, used daily by 50+ people, including progress and workflow tracking features. (MERN, MySQL, REST API)
- Areca Plate Manufacturing — Feasibility Dashboard:** Self-initiated BI project distilling 12 months of production data into a 4-page decision-support dashboard for non-technical stakeholders (micro-entrepreneurs) — an exercise in making complex data accessible to a specific audience. (Python, Power BI, DAX)

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google / Coursera (2026)
- Oracle Java Foundations — Oracle MyLearn / Oracle University (2026)
- Data Analytics Essentials — Cisco (2025)

EDUCATION

Master of Computer Applications (MCA) — Erode Sengunthar Engineering College, Erode, Tamil Nadu (2023–2025)

B.Sc. Computer System and Design — Kongu Engineering College, Erode, Tamil Nadu (2020–2023)
